PROFILE

Software Engineering Student with experience in intelligent systems, IoT, and artificial intelligence, interested in building practical and accessible solutions. With international and leadership experience as a youth ambassador, along with active involvement in volunteering and community initiatives. Adaptable, motivated, and eager to grow in a professional environment.

EDUCATION

Haliç University — Istanbul, Türkiye
Bachelor of Software Engineering — Mar 2022 – Mar 2026

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Artificial Intelligence, Data Mining, Deep Learning, Natural Language Processing, Computer Vision, Software Testing, Internet & Web Programming, Visual Programming

EXPERIENCE

OK Farm |Agricultural Company — Jul 2025- Aug 2025
Data Analysis Intern — Internship

- Analyzed agricultural and financial data to support future planning based on data insights .
- Designed an agricultural dashboard to identify the most and least profitable activities for the company.

Web Development Intern
Remote — Jul 2024- Sep 2024

- Developed a car rental web application using HTML, CSS, and JavaScript.
- Designed user-friendly interfaces for vehicle browsing and booking simulation.
- Implemented structured layouts and web design as well basic form validation for usability.
- Strengthened front-end development skills through practical application.

Sales Representative Digital Products & Courses
Remote — Dec 2022 - Mar 2023

- Assisted in promoting and selling digital products and online courses.
- Communicated with clients and responded to inquiries professionally.
- Developed strong communication, persuasion, and customer service skills.
- Worked in a fast-paced sales environment and adapted to client needs.

PROJECTS

Presented a research paper at the IEEE International Conference on Communication Systems and Network Technologies on intrusion detection in Zigbee smart home networks using machine learning techniques.

Applied unsupervised learning techniques to analyze network-related data.

Conducted comparative analysis to evaluate network behavior and performance patterns.
Smart Home Assistive System for Deaf and Blind Individuals — Academic Project

- Designed a smart home system project for assisting deaf and blind individuals.
- Implemented intelligent system logic focused on accessibility, safety, and usability.

Smart Disaster Response Network: Predictive IoT Mesh System Research Project

- Conducted a research on predictive IoT mesh networks for emergency management.
- Proposed an intelligent IoT-based architecture to enhance disaster response and communication.
- Conducted system design, analysis, and literature review.

LEADERSHIP & GLOBAL ENGAGEMENT

- Youth Ambassador – U.S. Exchange Program (YES), Toledo, Ohio
  - Represented home country in an exchange program promoting leadership and mutual understanding.
  - Collaborated and developed strong cross-cultural communication skills.
  - Participated in community service and leadership development initiatives.
- Volunteer & Community Engagement
  - Completed over 150 hours of community service and volunteering.
  - Actively participated in women empowerment and youth development programs.

TECHNICAL SKILLS

- Programming: Python, JavaScript, C++
- Web & Markup: HTML, CSS, XML
- Tools: MS office,Overleaf (LaTeX), Visual Studio Code, GitHub, MySQL(learning),canvas

INTERNATIONAL EXPERIENCE & AWARDS

- Teen Outreach Program Award – Women Empowerment
- Peace Scholar and Leadership rotary Award (2019)
- U.S. Department of State Certificate Completed over 100 hour of Volunteering

ADDITIONAL

- Soft Skills: Leadership, teamwork, adaptability, problem-solving, organization
- Languages: English (Fluent), French (Fluent), Turkish (Intermediate)
